# Up-Lighting

## Why Up-Lighting?

- ⇒ The best events are always well-lit. Up-Lighting provides a stunningly elegant effect that will enhance your reception hall or event center.
- ⇒ When your guests enter into the room for your event, visual appeal will play the biggest role in setting the proper tone and ambiance.
- ⇒ Lighting creates an initial impression and raises the expectations of the guests which is key to a successful event. When your guests come in, impressed and expecting a good time, it makes the entire evening flow smoother.

## Services

- ⇒ Up-Lighting is generally placed near the wall aiming up toward the ceiling. The Up-Lights can be programmed to gently roll between colors or to stay on a single color, depending on your wishes. These Up-Lights are used to accentuate wall space and room architecture and can be dramatic or subdued.

Up-Lighting services by DJ C can be purchased stand alone or as a package.
